Our 40 years experience and know-how is purely reflected on the painting methods we are using, so the results are nothing more than dazzling finishes, with high endurance and “mirror” like reflection. All these escorted by our Certifier Guarantee. The above combination along with the required caution and maintenance, is the key for the long lasting, high end desired result.

Our quality standards are kept extremely high, strictly based on International Standards like ASTM or ISO, so the final result be the admirable one for the customer and for us. Along the acceptance criteria (which are agreed in advance), once the project is done, a full assessment will be delivered to the client concerning of tasks performed.

Some Numbers:

- ▶ Average yacht painting projects 7 per year.
- ▶ 92 Gloss Units* Guaranteed for every undertaking project with an average of >95 within the last years.
- ▶ Fully equipped mobile workshop, with crew consisted up to 30 experienced technicians, (apart from the assistants), lighting & heating/ventilation units, scaffolds and the coverage equipment.
- ▶ First class co-operation with 20+ companies in the coatings/paint equipment industry.

* Gloss Unit (GU) = Gloss measurement unit with more than 70% @20dgrs considered high gloss.

Varnishing

Although the wood has by itself a natural beauty, a careful varnish job will highlight it at the maximum and protect it in parallel. However in the case that the yacht's wood have been neglected for some reasons, our company is able to restore it and bring back its glow with a crystal, bright and professional finish.

With the appropriate varnish job on your yacht the wood will not look only brand new but will also increase the boats value. In most cases the right wood protection is absolutely imperative once we are talking about boats, sea and sun.

Therefore in our company we have everything is required to achieve the best result for this demanding kind of painting. Patience and craftsmanship. These two are the elements for a well performed job. Especially on Varnishing which requires many layers for the Crystal Clear result that we all envy.
